PHONE MIN MYAT

WEB DEVELOPER

PERSONAL DETAILS

- Name : Phone Min Myat
- Date of birth : 20th May, 2003
- Gender : Male
- Marital Status : Single
- Nationality : Myanmar
- Address : Mandalay, Myanmar
- Telephone : +959797865875
- Email : phoneminmyat102115@gmail.com
- Portfolio : https://phoneminmyat102.github.io/
- Github : https://github.com/phoneminmyat102

Education

- First Year Student of University of Medicine, Magway (dropped out)

Certificates

- Information Technology Professionals Examination Council - Fundamental Information Technology Engineers Examination
  (+ Certificate of Excellence awarded)

Work Experience

Backend Developer at **UOC Tech | Jan 2024 - Jan 2025**
Technologies: Laravel, Fastapi

- Developed RESTful APIs for a **School Management System** with features like role-based authentication and authorization for teachers, student grading and marking systems, and exam/report generation.
- Integrated **Laravel Excel** to support data import/export (e.g., student marks, grades, attendance reports).
- Built backend services for a **Restaurant Management System** covering order tracking, menu management, and user authentication using FastAPI.
- Collaborated with frontend teams and ensured secure, scalable, and maintainable code.

Junior Full-Stack Developer (Freelance) | Jan 2023 - Dec 2023
Technologies: Laravel, Vue.js, Inertia.js

- Contributed to an **Education-learning Platform**, debugging frontend issues and implementing key features including:
    - Notification system
    - Invoice management
    - Image optimization
    - End-to-end testing using Cypress
- Worked on both frontend and backend layers, ensuring seamless integration and a smooth user experience.

SKILLS

- Html, Css, Bootstrap, TailwindCss
- Javascript, Node.js, Express.js, Vue.js
- PHP, Laravel
- Python, Fastapi, Django
- MySQL, MongoDB
- Git , Github
- Windows, Linux

Languages

- Burmese (Native)
- English (Intermediate)
- Japanese (N3 JLPT)

Highlight Projects

1. **Ride Sharing Web Application**
   - *Description*

       It's a web app for ride-sharing where passengers can pick their destination, notify nearby drivers, and track the trip's progress on a map in real-time.

   - *Technologies Used*

       Html, Css, Tailwind Css, Js, Vue.js, PHP, Laravel, Websocket, MySQL, Google Map Api, Twilio

2. **FastAPI Project Scaffolding CLI Tool**
   - *Description*

       Built a robust CLI tool to automate the creation of scalable and modular FastAPI project structures. The tool generates boilerplate code following repository-service-router patterns, integrates utilities like custom API responders, serializers, and paginators, and supports module-based code generation (e.g., auth, user, etc.) with JWT authentication and MySQL support.

   - *Technologies Used*

       Python, FastAPI, Jinja2, SQLAlchemy, Pydantic, MySQL, Click

3. **Simple Live Chat Application**
   - *Description*

       A real-time chat application built with Laravel and Vue.js. Implements dynamic frontend interactions and real-time communication using Pusher for broadcasting events and Laravel

Echo on the frontend. Includes user authentication and message persistence in the database.

- ***Technologies Used***

  Html, Css, Tailwind CSS, JavaScript, Vue.js, Laravel, Pusher, Laravel Echo

4. Online Shop E-commerce

- ***Description***

  It's a modern e-commerce website with features like product and category management, cart and order management, payment processing, and user-friendly interfaces. Users can filter products by category, brand, and price.

- ***Technologies Used***

  Html, Css, Tailwind Css, Js, InertiaJs, Vue.js, PHP, Laravel, MySQL, Flowbite for UI components, Stripe Payment Gateway

5. Invoice Management System

- ***Description***

  It's a straightforward invoice management system for ecommerce websites. Users can create, edit, delete, and print invoices for customers.

- ***Technologies Used***

  Html, Css, Bootstrap, Js, Vue.js, PHP, Laravel, MySQL
